Profile

Frontend and Backend Developer with 1.9 years of experience in building web applications. Experienced in creating user-friendly interfaces and developing efficient backend systems. Skilled in API integration and improving application performance. Always eager to learn and build high-quality software.

Education Qualification

GURU NANAK COLLEGE Aug 2020 - April-2023

Bachelor of Science(B.Sc) in Information Technology

CGPA: 7.8/10 (A+ Grade)

Technical Skills

• Version Control: Git, GitHub

• Development Tools: Visual Studio Code

• Programming Languages: JavaScript (ES6+), TypeScript, Java, Node.js

• Markup & Styling: HTML5, CSS3, SCSS

• Frameworks & Libraries: React.is, Express.is, Redux, Bootstrap, Tailwind CSS

Databases: MongoDB, MySQLTechnologies: JSON, RESTful APIs

• Java & Backend Development: Java Spring Boot, Maven

• Other Tools & Practices: Webpack, Babel, Postman (API Testing), Swagger (API Documentation)

Work Experience

Role: Software Developer

Acumen Technology Pvt Ltd | Chennai

August 2023 – Present

Project: Mettler Health Care Hospital Management Web Application

Description:

- Contributed to the development of a hospital management web application aimed at streamlining operations, enhancing patient care, and optimizing resources.
- Features included patient and staff management, inventory control, and analytics, with a focus on customization, scalability, and compliance with regulatory standards.

Technologies Used:

JavaScript, React Js, Redux, TypeScript, Material-UI, Java, MongoDB., HTML5, CSS3

Key Achievements:

• Developed an intelligent healthcare form automation system, integrating voice conversation recording and dynamic form creation with Al-driven automatic form filling.

Project Highlights

- Implemented a system to record patient-doctor conversations, enabling detailed analysis and data extraction.
- Designed dynamic form creation functionality, allowing the admin to generate custom forms tailored to specific time-sensitive requirements.
- Leveraged AI to auto-populate forms with information extracted from conversations, such as medications, dosages mentioned by doctors, and patient-reported issues..
- I've worked on projects where I consumed REST APIs for features like data retrieval and form submissions. I'm also comfortable using tools like Postman and Swagger for testing

Certificates

- Programming Essentials in Python Cisco Networking Academy | 2021
- Aiwozo RPA Business Analyst Silver Aiwozo | 2023
